Producing and running a MOOC for the first time

Evaluation from the instructors' perspective

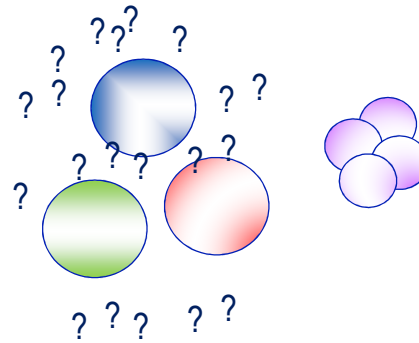

Matty Janssen & Anna Nyström Claesson

Outline

- **Examples of experiences**
- **What is the SiEL MOOC?**
- **“MOOC processes” and roles of the teacher/instructor**
- **Change in roles over time**
- **Conclusion**

Complicated to complex and back to complicated

Production

How to write a mini-lecture

- 700 words
- 5-7 min
- Talk to the MOOCy
- Only pictures

Energy and week 0

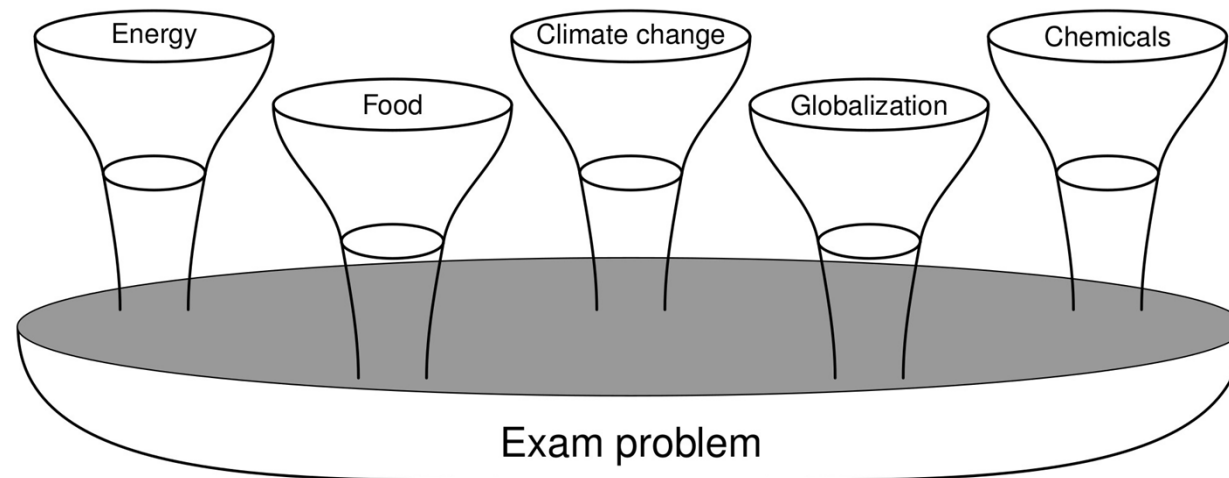

Which forms of carbon are available to plants?
(Find the correct answer!)

- Carbon dioxide and carbonate
- Coal and diamond
- Methane and carbon dioxide
- Only Carbon dioxide

Short overlook of the SiEL MOOC

- **SiEL = Sustainability in Everyday Life**
- **Five topics → chemicals, climate, energy, food, globalization**
- **Design**

Short literature review

- **Surge in number of MOOCs → Increased scrutiny** (Kolowich, 2013; Kellogg, 2013; Margaryan et al., 2015)
- **Less focus on the role of the teachers and their motivations**
 - **Teacher's experience and identity may determine the success of MOOCs** (Ross et al., 2014)
 - **Experimentation, professional development** (Stöhr et al., 2015)
 - **Roles during design and early development** (Janssen et al., 2016)
- **Action research into MOOCs → Design process, participant engagement and experiences** (Vivian et al., 2014)

Research method

- **Action research approach**
 - **Grounded in experience, action-oriented and participative (Reason & Bradbury, 2001)**
 - **Participant observers, collaborative team involved in reasoning, action formulation, and action taking (Baskerville and Myers, 2004)**
 - **Applied in Janssen et al. (2016) to explore roles of teachers in early design and development of the SiEL MOOC**
- **Goal in this paper**
 - **How have our roles changed during the further development and running of the SiEL MOOC?**

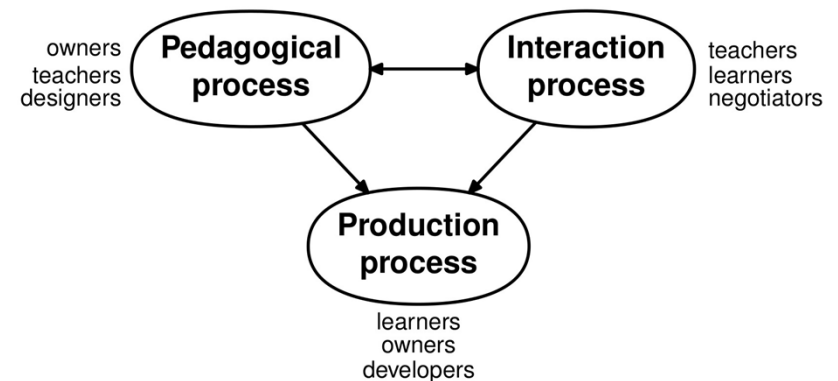

Our roles during design and early development

- **Three processes and six different roles were identified** (Janssen et al., 2016)
- **Roles and processes are closely linked**
- **Assumed roles and ability to switch have been instrumental**
- **Sense of ownership was a strong driver**

Our roles during further development and running the MOOC

- **Agility became key → Interaction more important**
 - **Facilitators**
 - **Problem solvers**
- **Teacher role changed → Focus from colleagues to MOOCies**
 - **Discussion forum**
 - **Update videos**

Conclusion

- **Action research approach**
 - **MOOCs**
 - **Roles of teachers**
- **Different roles in different processes, roles change over time**
- **Personal notes**
 - **You learn a lot**
 - **Keep things complicated, not complex**

Thank you for your
attention!

Any questions?
